

Reflection Questions

Our focus is to take a step back to reflect and become more self (program) aware of the current level of family engagement in our individual programs and to strengthen our efforts to build and embed these important familial relationships within the culture of our programming.

How will we strengthen our program's culture of family engagement?

We will achieve this through creating space for individual reflection, team discussions and family engagement coaching using the ASSESS – PLAN – IMPROVE process and by reflecting on questions such as:

- **How family-friendly is our program?**
- In what ways do we show families that we value them, their culture, their strengths, their goals and values?
- **How are families made to feel welcomed and safe in our program?**
- What opportunities do families have to develop a sense of belonging within our program?
- **What opportunities do we provide for families to participate in our program and how do we communicate this with them?**
- How do we get families voices involved and foster co-ownership and creation of solutions?
- **In what ways does our program reflect a culture of inclusion and equity with families?**
